

FLEUR DE PARIS

Did you know that hats started as protection from the elements? Over the years, different cultures have used hats for various reasons: fashion, protection, disguise, decoration, entertainment, religion, medicine or distinction. It is often said “If hats could talk, they would have interesting stories to tell.”

Did you know that hats started as protection from the elements? Over the years, different cultures have used hats for various reasons: fashion, protection, disguise, decoration, entertainment, religion, medicine or distinction. It is often said “If hats could talk, they would have interesting stories to tell.”

Makeover Artistry by Donna Sousa productions was inspired by several visits to New Orleans French Quarter. After visiting amazing boutique , "Fleur de Paris" where all the hats are handmade one-of-a-kind pieces of art by creative artist Kimberly.

Donna was inspired to use the beauty of French quarter with their impressive courtyards and boutiques as a background to showcase these beautiful creations.

In Donna's words:
"With the help of
some beautiful, one-
of-a-kind Designer
Couture dresses to
enhance the hats, the
project was made so
much more exciting!"

“

Special thanks to Yumi Katsura for allowing us to include their black one-of-a-kind bridal dress in the shoot.”
